Personal Statement-

I am individual, analytical and see rich possibilities in the design of tactile surfaces. Colour and texture are key qualities I use in my work, often exploring the surreal and abstract. I am confident in my ability to produce work to the highest standard and this was confirmed when both Nova Glass and Ege Carpets selected pieces of my work to be exhibited at The Surface Design Show in London 2013. By doing a year of Textile Design as well as three years studying Surface Design, I can ensure that the combination of my determination and drive, together with my knowledge and skills will be of great value to your company. I remain positive and calm, working well under pressure. I am a loyal compassionate person who will fit in well with your team, bringing new and exciting ideas.
